Internships Available at SCEC
Opportunities for Undergraduate Students

Description:
Conduct field, laboratory, and/or theoretical research under the supervision of leading scientists in the fields of geophysics, earthquake geology, seismology, computer science, tectonics, and geodesy.

Term & Location:
10 week program (May through August)
At various SCEC institutions

SURE
Summer Undergraduate Research Experience

Description:
Undergraduate Studies in Earthquake Information Technology

Description:
Work as a team to develop technical tools for scientists, educators, and policy makers about earthquakes, faults, seismic hazard mitigation, and earthquake risk reduction.

Term & Location:
June 13 - August 5, 2016*
University of Southern California

Visit www.scec.org/useit for more information.

* UseIT is not offered in Summer 2015.

Candidates:
All interns should be enrolled as an undergraduate student during the entire year of 2015 (i.e. you must be in school at least until the end of the Fall 2015 semester/quarter). High school graduates who have been accepted at an undergraduate institution but who have not yet started their undergraduate study are also eligible to participate.

Application process begins December 2014
Priority deadline to apply is February 23, 2015
